

The background of the entire advertisement is a photograph of a golden-brown field of harvested grain under a bright blue sky with scattered white clouds. In the foreground on the right, a large roll of straw baling twine sits on the ground. A golden crown with red and white stripes is placed on top of the roll. In the distance, several other smaller rolls of twine are visible on the horizon.

# *Polywrap<sup>®</sup>* *imperial*

## **Interwoven Lightness and Performance**

*Wrap longer  
without a break*

With extra running length and tear-resistant mesh structure, you can wrap longer without interruption. The wide-meshed, staggered weave ensures even bales without tearing.

# The crowning **glory** for every bale

## Pomp and circumstance for our Polywrap® imperial!

An innovative net technology succeeded in increasing the resistance of the bales and optimizing the edge to edge wrapping. For the production with this new technology, special raw materials are used which make the net lighter and at the same time even more efficient. Combined with careful processing, the result is an outstanding net that performs impressively on all balers.

**Powerful baling in a new dimension, that's imperial!**

**Sizes:** Extra lengths of: 1,23 m x 2.500 m/3.900 m • 1,25 x 2.500 m/3.900 m • 1,30 x 3.900 m

### ✓ **No-Laddering-technology:**

The special weave prevents net laddering, ensuring stable bales with no waste.

### ✓ **Longer and stronger:**

Extended roll length, strong material, and enhanced tear resistance ensure longer use and maximum reliability during baling.
