Bird protection net

**Small effort. Big impact.**

**Tear-resistant, weatherproof,  
and exceptionally durable –  
thanks to high-quality, UV-  
stabilised HDPE.**

## **Why a bird protection net?**

Ripe fruit attract birds – often before you get the chance to harvest them. A bird net provides an effective solution: it reliably protects fruit, vegetables, and seeds from bird damage without affecting your plants. This way, you secure your yield – without chemicals and with minimal effort.

## Bird protection net

- ✓ **Extremely tear-resistant** – made from high-quality HDPE
- ✓ **Weatherproof & UV-stabilised** – withstands sun, rain and wind
- ✓ **Fine mesh (20 x 20 mm)** – optimal protection without blocking airflow
- ✓ **Easy to install** – lightweight, flexible, and ready to use
- ✓ **Versatile use** – for beds, shrubs, trees, and also ideal for buildings and animal enclosures
- ✓ **Durable & sustainable** – reusable for many years
- ✓ **Discreet green colour** – blends naturally into any environment
- ✓ **Available in many sizes** – always in stock, even for large areas

**Effective protection  
against bird damage –  
for gardens, orchards,  
and agriculture.**
