

Premium
Underlayer film

Die Regeneratfreie

Safety right from the start

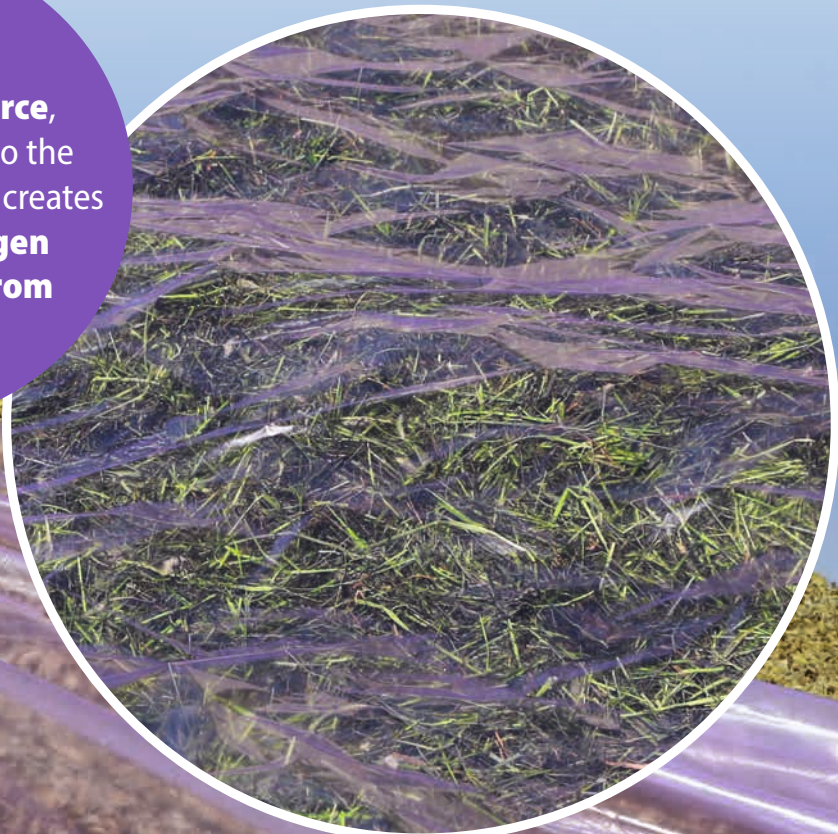

Underlayer films remain an essential component of professional silo coverings. Thanks to its unmatched adhesive properties, **agrifol® „DIE REGENERATFREIE“** is the leading brand, providing the ideal foundation for efficient and cost-effective silage preparation.

Due to the direct contact with the silage, the food safety of this film is extremely important! **Pure virgin raw materials** without waste plastic prevent that harmful substances or toxic residues from recycled material enter the feed. **For the health of humans and animals.**

Recognizable by the soft
purple shade • 40 µm

Due to the
high adhesion force,
it adapts optimally to the
fresh silage and thus creates
a **maximum oxygen
blockade right from
the start.**

- ✓ **Virgin materials** – Pure raw materials free from waste plastics
- ✓ **Food safe** – ensures hygienically sound silage
- ✓ The first underlayer film to receive a **DLG quality seal**
- ✓ **Superior adhesion** and **maximum oxygen blockage**
