

# infraprotect

The strong infrared-protected barrier film

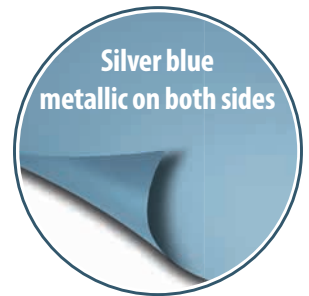

Oxygen barrier, solar reflection,  
and strength – combined in one  
innovative silo cover

- ✓ **EVOH barrier layer** for maximum oxygen barrier
- ✓ Silver-blue metallic glossy surface **reflects sunlight extremely** and thus **reduces the heat effect on the silage**
- ✓ **7 layers**
- ✓ **Regenerate-free** – pure raw materials without used plastics
- ✓ **Unique tensile and tear strength** thanks to the use of metallocenes
- ✓ **18 months UV-stable**
- ✓ **110 µm thick**: Ideal film thickness for safe handling in the silo
- ✓ **Weld seam-free** up to 20 m wide

Silver blue  
metallic on both sides

Very high re-  
flective power even  
in the infrared radiation  
range, resulting in:

- **Significantly better deflection of heat radiation**
- **Less heating of the silage**

Sizes in m and rolls/Pallet:

6 x 50	11	16 x 50	11
7 x 50	11	16 x 300	1
8 x 50	11	18 x 50	11
10 x 50	11	18 x 300	1
12 x 50	11	20 x 50	11
12 x 300	1	20 x 300	1
14 x 50	11	22 x 300	1
14 x 300	1
